METHOD

How we did it

The sample

1,904 searches, read for AI Overviews in Ireland Q4 2025. Example data, made up for the mockup.

The method

A fixed set of Irish searches per sector, run from an Irish address, the AI answer and its sources recorded.

The check

Vera checked every number against the source before it went on the page.

What is free

Every sector's share and sources. Every finding and every figure on this page, no form.
