

The team project: create a digital marketing agency

What you will do

You will work in a team of four or five. Your team will create a digital marketing agency. Your agency sells digital marketing services to other companies.

You will do this work using Claude. We will show you how in class.

What your team has to make

1. A clear answer to two questions: who does your agency sell to, and what do you say to them?
2. A plan that explains how your agency will get customers.
3. A website for your agency. You design it, write the words and make the pictures.
4. Work that helps your agency show up when people ask an AI tool such as ChatGPT for a recommendation. This is called GEO.
5. Messages to companies that could become your customers. This is called outbound. The companies are made up and you will not send the messages to anyone.
6. At least three marketing agents that work for your agency. A marketing agent is an AI that does a marketing job for you. Your team chooses which jobs.

You use everything twice

Each week you will learn one part of digital marketing. You will use it to market your own agency. It is also a service your agency can sell to its clients. For example, you will learn how to build a website. Your agency needs a website, and your agency can build websites for clients.

The data

Every team gets the same data. It is a list of made-up companies and people for the CRM tool, Attio, and a list of made-up email subscribers for the email tool, Klaviyo. There are no real people in it.

The marks

The project is your portfolio for this module. You add to it every week. The portfolio is 20% of your mark. The written exam is 80%, and you must pass the exam to pass the module.

The dates

Monday 12 October	The project is explained. Teams are set.
Monday 19 October	Your team chooses its marketing agents. You set up Claude on your laptop in class.
2 and 9 November	You build the website and do the GEO, the paid search plan, the ads and the posts.
Later in November	You set up your customers in Attio, write your outbound messages and write your emails in Klaviyo. The days are to be confirmed.
The last class	Each team presents its agency to the class. The day is to be confirmed.

What you need

A laptop, from Monday 19 October.
