

PREPARED FOR DAVE HACKETT, DATA INTELLIGENCE

Build the Data Intelligence marketing team you **never had**

A marketing team, built for Data Intelligence and handed over. First a practical, empirically solid marketing strategy and execution plan, built to create fame fast on controlling technology costs. Then the AI systems to run it at quality and speed, a range scoped together. Then a fractional CMO to keep it improving. This is the plan, and how it works.

Quality first, then automate

IRELAND'S MARKETER OF THE YEAR, 2022

Before I build anything, I ask one question: what does really good look like here? Not what AI can do, but the best version of this marketing, and the level of quality I would want to stand over.

So I start where I always have. If there were no AI at all, what team would I hire to do this properly? A strategist to set the positioning and the plan, someone building your authority in public, and someone running the campaigns and keeping score. I map that team first, then build exactly it, with agents instead of hires.

Twenty years in brand is what tells me where the bar sits: Head of Brand at O2 Ireland, then CMO at the National Lottery, Head of Brand at Indeed and Miro, both global roles. Positioning, messaging and tone are written first, then built into everything the agents make.

WHO I WORK WITH

Moloco

Heineken

Norcros

Alltech

Smurfit

Hostelworld

Eaton Square

Weatherbys

"His command of marketing science as well as his instincts for great thinking and ideas are, in my opinion, superb."

Peter Field · The Godfather of Effectiveness, author of The Long and the Short of It

"Paul reported into me as Head of Brand when I was at Indeed. I have learned more from him than anyone else in my career."

Paul D'Arcy · CMO, Moloco. Former CMO at Miro and Indeed

A new company, a clear space to own, and no time to waste.

Everything here comes from our conversation. Data Intelligence is starting from a blank page, and that is the opportunity: no one yet owns the conversation about controlling technology costs, and you want to be the name that does, quickly. The strategy has to come first, the go-to-market and the plan, or the marketing is just noise. Then the AI systems to run it at quality and speed. Then a fractional CMO to keep it improving and steer whoever runs it day to day.

-
- 01 **The strategy and plan.** A practical, empirically solid marketing strategy and execution plan: go-to-market, budget allocation, creative and messaging. Built to create fame fast, on category entry points and mental availability, using channels like radio on purpose, not incrementally.
 - 02 **The AI systems to run it.** A range I have built and proven: a Campaign Manager, a Ghostwriter, a Copywriter, a Website Builder, Outbound agents and a GEO Search Agent. Which ones Data Intelligence needs falls out of the plan, not now. Built to a quality bar, at speed; four are shown on the web version as examples.
 - 03 **Fractional CMO.** Two days a month once it is live: training the junior marketer, new creative, marketing analysis, fixing and tweaking, and the go-to person for whoever runs it.
-

The strategy and plan, then the systems to run it

PART ONE · THE THINKING

The strategy and plan

Before anything gets built, we decide how Data Intelligence goes to market. Not a positioning document that sits in a drawer, a practical marketing strategy and execution plan: how to reach the market, where the budget goes, and the creative and messaging that carries it. Empirically grounded, and built to do one thing, create fame fast.

Winning early is not doing a bit more of everything. It is getting as many inquiries and as much awareness as possible, as quickly as possible, and building the category entry points and mental availability that make Data Intelligence the name people think of the moment their technology costs feel out of control. That means channels like radio alongside the go-to-market work, chosen on purpose, not incrementally.

PART ONE · THE BUILD

The AI systems to run it

A plan is only worth as much as the execution. So the second half of part one is building the AI systems that run it, at the quality bar twenty years in brand sets, and at the speed a new company needs. Your team approves; the systems do the work.

I have a range already built and proven, and which ones Data Intelligence needs falls out of the strategy and plan, not now: a **Campaign Manager** to plan and track it all, a **Ghostwriter** to build the name in Dave's voice, a **Copywriter** for everything that needs writing, a **Website Builder** for the site you do not have yet, **Outbound agents** if you are not already covering that, and a **GEO Search Agent** to get Data Intelligence surfaced inside the answers AI tools give. The web version shows four, built as examples: the Ghostwriter, the Copywriter, the Website Builder and the Campaign Manager.

A sense of how I build: [Dump your website and start again](#) · [How I build an AI writer](#)

One engagement, in two parts

This is not a menu to choose from, it is one piece of work with two phases. First I build the strategy and plan, and the AI systems to run it, and hand them over, in your own tools, in your name. Then I stay on as your fractional CMO, a couple of days a month, so the system keeps improving and whoever runs it has a senior marketing head to go to.

PART ONE · THE BUILD

The strategy and plan, and the AI systems to run it

- › A fame-first marketing strategy and execution plan: go-to-market, budget, creative and messaging
- › Built on category entry points and mental availability, empirically grounded
- › The AI systems to execute at quality and speed, scoped with you
- › Built around your brand and handed over

€15,000 + VAT

A one-off project. The mix of systems (Campaign Manager, Ghostwriter, Copywriter, a Website Builder, Outbound) is scoped together. Tools separate, sized with you.

PART TWO · THEN, ONGOING

Fractional CMO, two days a month

- › Two days a month, once the build is live
- › Training and steering your junior marketer
- › Fixing and tweaking, new creative, marketing analysis
- › The go-to person for whoever runs it day to day

€3,000 per month

Month to month, begins once the build is handed over. Tools separate, as above.

WHAT THE PRICE COVERS

The strategy and plan, the AI systems built to run it, the handover and the training, then a senior head kept on the work every month. You own the system and the strategy it runs on.

WHAT IT DOESN'T

Your own tool subscriptions: Claude Code, hosting and the email platform, which stay in your name and your ownership. A modest, predictable software bill, sized and agreed with you before a euro is spent.

Book a time to chat

Thirty minutes is enough to talk it through. Book a time at cal.com/paul-dervan-mjfd50, or email me directly at paul@runwithfoxes.com.
